About

For the past 12 years I have built machine learning systems that served millions. In 2019 I founded and led one of the first generative AI companies in the world, and since then, I am leading cross-disciplinary teams tackling challenges in AI research, serving, scaling and productization..

Experience

12/2022 - PRESENT
VP R&D, Skippr

- Building generative AI tools for product design

- Leading an engineering and ML team of 8 productionising cutting age generative AI technologies.

10/2019 - 12/2022
Co-founder, ART AI

- Led a team of 12 working on research, development and productization of cutting edge image generation technology.

- First company to launch a generative text to image product and scale it to millions of generations.

04/2018 - 10/2019
Machine Learning Consultant, Khealth

- Helped transition the company from classical ML algorithms to deep learning for predicting diagnosis.

- Advised management on scaling the Algorithms group of 25, recruiting & mentoring employees.

2014-2015
CTO, Pekama

- developed the software infrastructure of a legal-tech company, which involved fetching and organizing large amounts of data from multiple sources.

2011-2014
Machine Learning Engineer, IDF

Education

2017 - 2019 (unfinished)

Cambridge University - PhD Computational Biology

Left to found ART AI. Awarded MSc.

Research subject: Statistical methods for the analysis of subcellular mRNA localisation.

2015 - 2017

Tel Aviv University - MSc Applied Statistics

Thesis: [Efficient Construction of Test Inversion Confidence Intervals Using Quantile Regression](#)

2018 - 2011

Bar Ilan University - BSc Mathematics
